WHO WE ARE

NSDC – Novas Soluções de Construção S.A. is an Angolan engineering and construction company with a robust technical and operational foundation, specialising in the delivery of civil construction, infrastructure and technical installation projects.

Built on decades of accumulated expertise and a strong track record in the execution of complex and technically demanding projects, NSDC has established itself as a capable and reliable construction partner, equipped to manage large-scale projects from planning and coordination through to execution and completion.

Throughout our journey, we have contributed to the delivery of landmark projects across Angola, consistently upholding high standards of technical performance, quality, safety and operational excellence. Our approach is underpinned by a strong commitment to project control, schedule adherence and the highest standards of execution.

Today, NSDC stands as a trusted partner in the delivery of strategic and transformative projects, combining technical expertise, operational capacity and local knowledge to support the sustainable development of Angola.

- 95% Angolan workforce
- 88.7% Male | 11.3% Female
- Average employee age | 45 year

MISSION

To deliver engineering and construction projects with technical rigour, safety and accountability, providing high-quality solutions that meet our clients' requirements while creating sustainable value for our stakeholders.

VISION

To be a trusted reference in engineering and construction, recognised for our reliability, technical expertise and excellence in project delivery, while strengthening our position in Angola and building a responsible and sustainable presence in strategic markets.

OUR VALUES

SAFETY

An unwavering commitment to protecting the health, safety and physical well-being of our project teams and all stakeholders involved in our operations.

QUALITY

Rigorous project execution, supported by robust process control and strict compliance with applicable standards and requirements.

INNOVATION

The implementation of efficient technical solutions and the continuous improvement of construction methodologies and processes.

ETHICS

Transparency, accountability and integrity across our institutional, commercial and contractual relationships.

INTEGRITY

Consistency between what we say, what we decide and what we deliver, fostering trusted and long-lasting relationships.

ON TIME DELIVERY

A firm commitment to on-time project delivery, supported by structured planning, rigorous monitoring and continuous project oversight.

OUR EXPERTISE

OUR EXPERTISE

We operate across three complementary business areas, reflecting our technical expertise and operational capabilities across the construction sector.

CIVIL CONSTRUCTION

We deliver residential buildings, office developments, commercial spaces, hospitality projects and public facilities, as well as building rehabilitation and refurbishment works, ensuring technical rigour, construction quality and effective execution control.

INFRASTRUCTURE

We develop and deliver strategic infrastructure projects, including public facilities, education and healthcare facilities, cultural and sports infrastructure, industrial facilities, roads, bridges, viaducts, hydraulic works, as well as urban and environmental infrastructure.

TECHNICAL INSTALLATIONS

We provide specialised technical solutions across electrical systems, telecommunications, building management systems, heating, ventilation and HVAC, hydraulic networks and water treatment, as well as the design, fabrication and installation of steel structures.

Certifications

At **NSDC**, we operate with a firm commitment to **excellence** and continuous improvement.

We hold **ANPG** certification and are currently implementing the requirements for **ISO 9001**, **ISO 14001** and **ISO 45001** certification, further strengthening our culture of quality, environmental responsibility and occupational health and safety in alignment with international best practices and standards.

OUR PORTFOLIO

BITA PROJECT

LUANDA WATER SUPPLY SYSTEM

The BITA Project is one of the most significant water supply infrastructure projects currently under development in Angola, designed to strengthen water supply to the southern and south-eastern areas of Luanda, including Belas, Quenguela, Vila Verde, Cabolombo, Ramiros, Morro dos Veados, Benfica and Camama.

With an initial production capacity of 259,200 m³ of water per day, the system integrates water abstraction, treatment, transmission, storage and distribution, with the potential to serve approximately 3.8 million people.

NSDC is contributing to the delivery of this strategic infrastructure, bringing technical expertise, operational experience and rigorous construction standards to the development of essential solutions that support urban growth and enhance the quality of life of local communities.
